PROBLEM STATEMENT

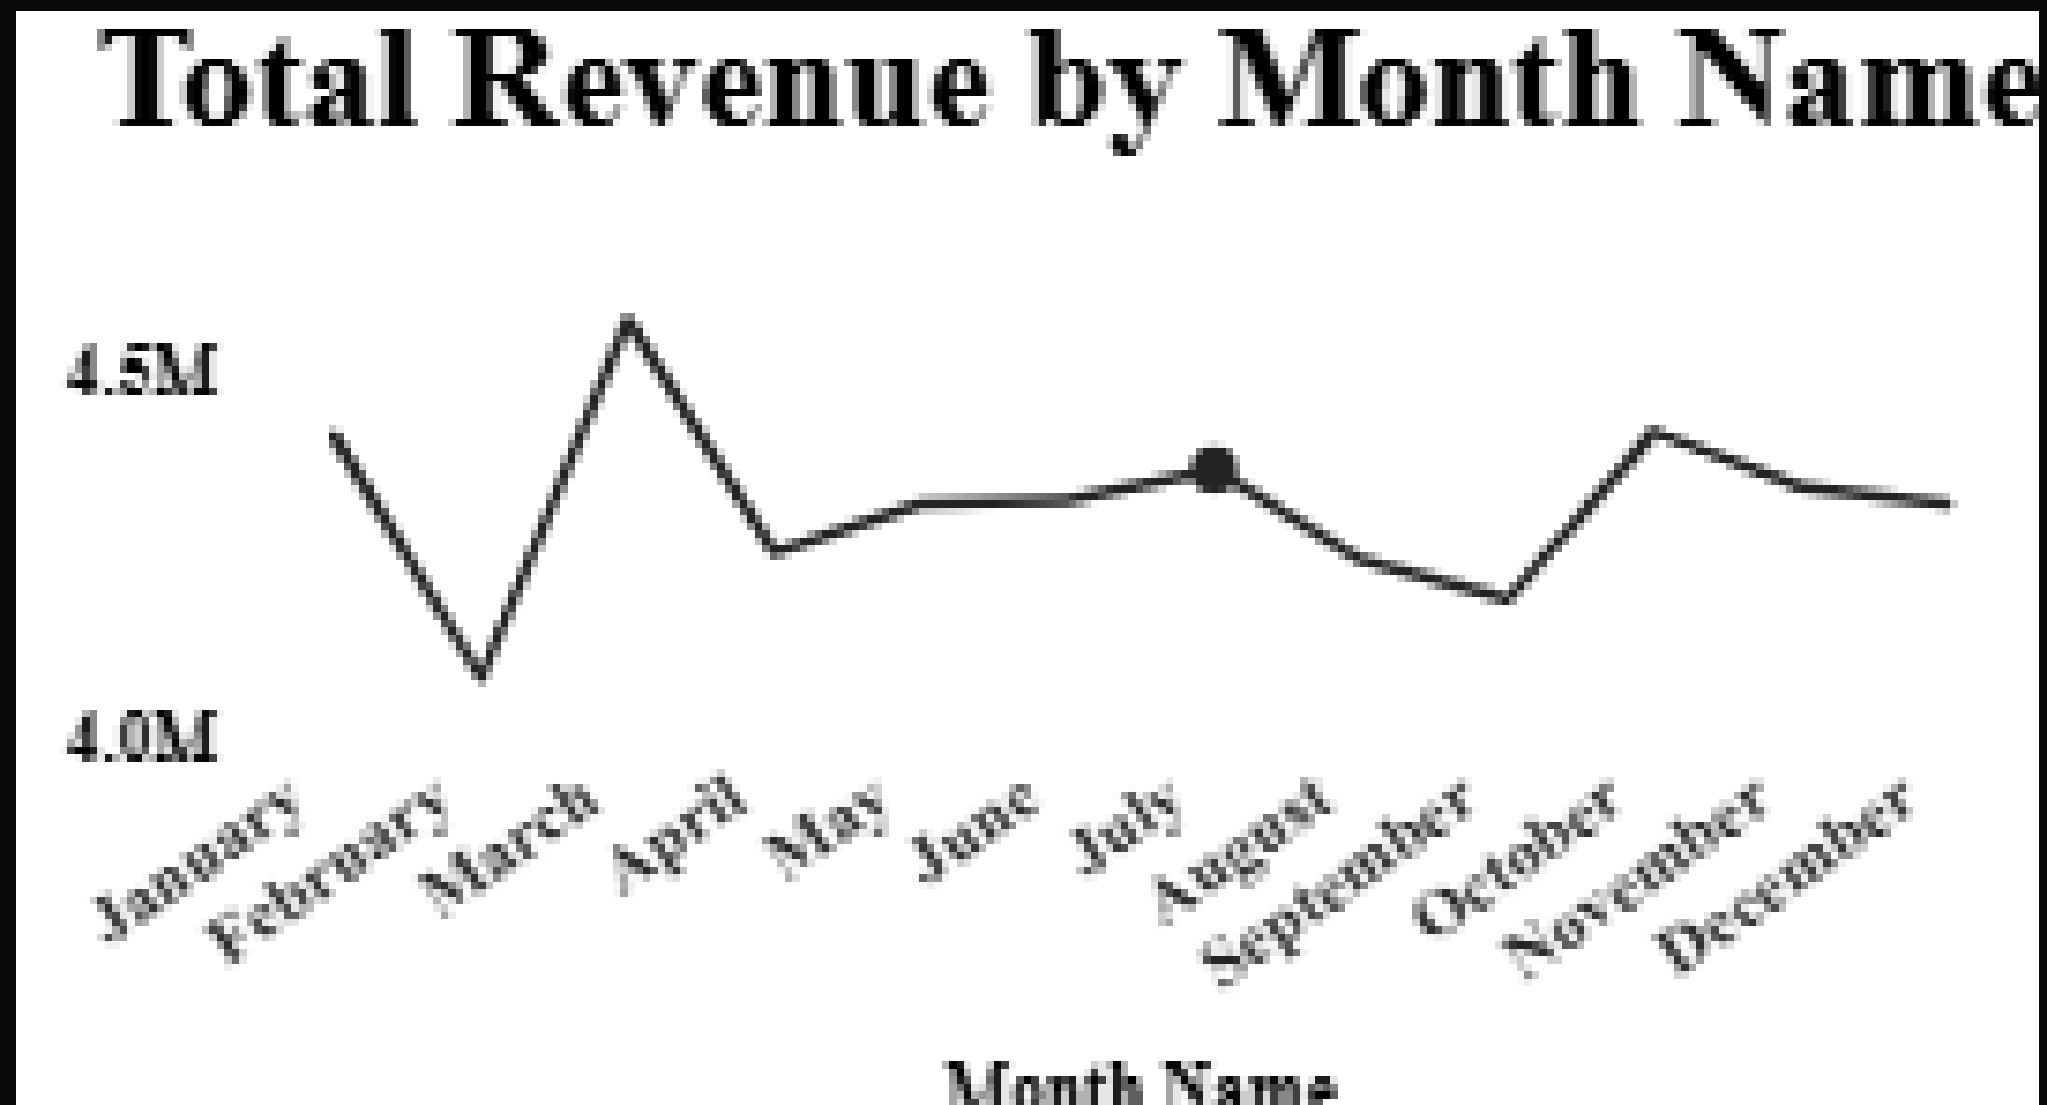

How can ride-booking data be analyzed to identify booking trends, revenue performance, vehicle-wise profitability, booking status distribution, cancellation patterns, customer payment preferences, and high-demand pickup locations in order to improve operational efficiency, enhance customer satisfaction, reduce ride cancellations, and maximize overall business revenue

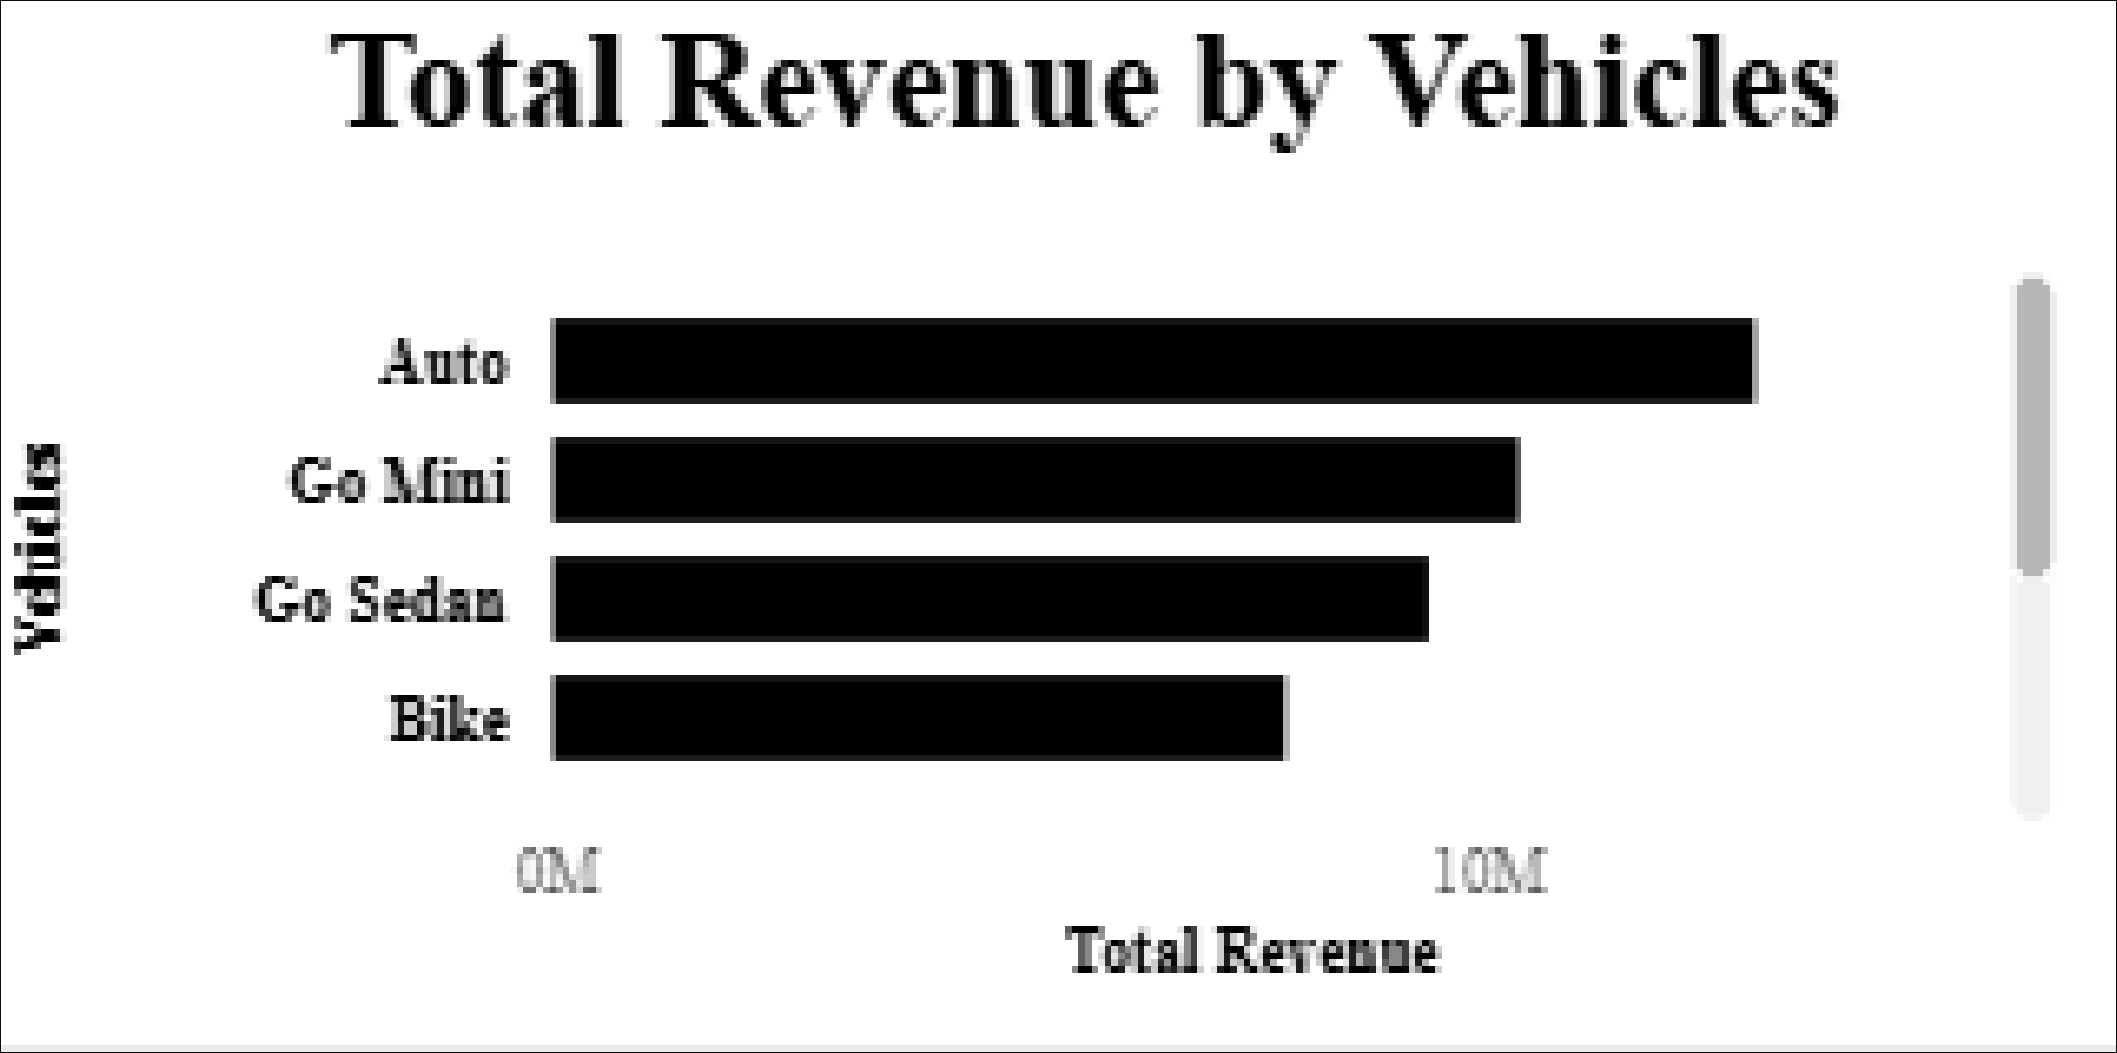

- 1) How have the total revenue changed month over month?**
- 2) Which vehicle type generates the highest revenue?**
- 3) What is the distribution of bookings by booking status (Completed, Cancelled, Incomplete, No Driver Found)?**
- 4) Which pickup locations have the highest number of ride bookings?**
- 5) Which payment method is most frequently used by customers?**
- 6) Which months contribute the most to booking demand ?**
- 7) What are the most common reasons for ride cancellations by customers?**
- 8) What are the most common reasons for ride cancellations by drivers?**
- 9) What are the most common reasons for incomplete ride?**

1) How have the total revenue changed month over month?
